

A & H BUILDING DESIGNERS PTY LTD

Helping you Achieve your Dream Home

5 MISTAKES

HOME OWNERS MAKE WHEN SEEKING APPROVAL FOR THEIR NEW HOME

- 1 Not hiring an accredited designer at the start of the project for guidance
- 2 Hiring a local draftsman for 'low-priced' set of plans
- 3 Being uninformed of current environmental issues relating to the property
- 4 Not considering underground infrastructure within the property
- 5 Unaware of government regulations

A & H Building Designers are the best choice when it comes to residential and commercial design, Council/Private Certifier Approval and Documentation and Project Management. We will walk you through the entire process - develop your concept, draft plans, obtain the appropriate council and/or private certifier approvals and finally, have our trusted builder to execute the whole project.

A & H Building Designers are accredited to look after all of your design, approvals and construction needs.

Our services include:

- Building Design Drawings
- Change of Use
- Development Applications
- Construction Certificates
- Complying Developments
- Building Certificates
